and secure fit

INSIDE SEAM
protects threads
from abrasion
and wear

Targeted Applications & Industries

Drivers gloves are designed to provide a balance of protection and dexterity. They offer superior grip and control, reduce hand fatigue, and help regulate hand temperature. Recommended for light duty applications such as machine operation and industrial uses.

Softer and more naturally padded than other leathers, elkskin is the top-shelf choice for premium drivers gloves

Elkskin reduces hand fatigue by molding to the wearer's hand and remaining soft even when hot and wet
