Dragon™

PBI/Kevlar® High-Heat Gloves

#PBI83514

Our Dragon™ series features an outer Kevlar® shell for protection against thermal burn around extreme heat (dry heat only) combined with a non-melting/combusting outer layer. Superior's Dragon™ PBI glove blends Kevlar® with polybenzimidazole fiber to protect your hands in high heat situations, providing you with worry-free high-heat protection. Low linting with ultra-low particulate shedding. The middle layer is 100% virgin wool knit with a high terry pile for excellent insulation, and glove is completely nylon-lined to minimize linting. Unbelievable protection and dexterity because the seamless-knit Kevlar® blend outer shell allows the Dragon™ to be made into a glove instead of a mitt.

Available in: 14" (PBI83514), 18" (PBI83518) lengths.

Kevlar® is a registered trademark of E.I. du Pont de Nemours and Company.

Classification for Conductive Heat Resistance

| Level | 0 | 1 | 2 | 3 | 4 | 5 |
|--------------------------------------------------------------------------------------------------------------------|-----------------|---------------|----------------|----------------|----------------|----------------|
| Highest contact temperature at which both time-to-2nd degree burn ≥ 15 sec. and alarm time ≥ 4 sec. (°C) | <80°C <176°F | 80°C 176°F | 140°C 284°F | 200°C 392°F | 260°C 500°F | 320°C 608°F |

DRAGON

FEATURES

- Protects against thermal burn (Dry heat only)
- Heat protection of up to 608°F (320°C)
- Outer layer will not combust or melt on contact with hot objects
- Ambidextrous

APPLICATIONS

Aluminum Extrusion
 Steel Mills
 Welding
 Glass Plants (hot/dry glassware handling)
 Extreme cold, such as liquid gas flask handling

AVAILABLE SIZES

ONE SIZE
