What MCR Safety Offers You

We Support our Distributors with exceptional resources:

- Two distribution facilities - Tennessee services most of our 9 adjoining states with next day LTL service; the east coast and Midwest with two day service. California also services the west coast with next day service.
- Sales Team – Sales Managers, Sales Specialists, and Customer Service collectively service our customer needs and provide unmatched PPE expertise.
- Consulting and Compliance Team – Strategically located field representation for the entire United States providing trade show and end user support to promote brand awareness and generate distributor sales.
- Independent Manufacturing Representative Groups – Additional sales support nationwide.
- SafetyLine newsletter – Market conditions for all PPE categories, safety posters and new product introductions are included on a quarterly basis to our distributors.
- MCR Safety web site – Comprehensive, user-friendly technology is reflected by the many Distributor Tools that are available 24/7 from our www.mcrcsafety.com web site.

We Provide marketing tools:

- Private labeling – Our catalog plus most of our PPE product offerings and accessories.
- Product image library – log in and download our product images, logos, and model shots in the format(s) you choose.
- National advertising – Industrial and safety trade journals, magazines, and web sites.
- Trade show participation – NSC, ASSE, VPPPA, World of Concrete, and various regional/international shows
- Lead management service – Available upon request.
- Trade Associations:

***Limited Flammability Tested to Specification of NFPA 701 & ASTM D6413-08

Note: Upsize charges of 5% apply to sizes X2 and above on all Protective Clothing.

Vending management of safety gear is spreading throughout our industry and across the nation. Vending programs provide opportunities to reduce costs associated with tool crib management. Companies are able to maintain usage records, regulate quantities dispensed, and control access to employees. Vending Gear options are available for our gloves, glasses, and garments.

Gloves are rolled, boxed, poly-bagged, and also available with hang tags (Look for the  symbol throughout the book.) Glove styles with "VP" incorporated into the style number are individually rolled and shrink-wrapped. Other gloves that are also suitable for vending machines include gear with point of purchase tags, dispenser boxes, and poly-bagged. 

Our vending options for glasses include individual poly-bags and bulk packaged within each case. Magnifiers are available individually boxed. Goggles are available in either individual boxes or poly-bags. Several accessories are also vending machine friendly. Our recently redesigned vest packaging provides vending friendly options. All rain gear and other garments are individually packaged but subject to vending machine capacity limitations.

Our Product Listing and Price Lists do reflect "pair" and "each" unit of measure which are potentially vending machine ready. All VP styles must be purchased by the case pack. Contact your Sales Team for a complete listing of our Vending Gear.

Gloves rolled and rubber banded:

Types of Leather Used to Make Gloves

Common characteristics to all types of leather include superior abrasion resistance, tensile strength, breathability, and heat resistance. Often overlooked characteristics include the ability to absorb shock and provide good puncture resistance. Cow leather is the most common used leather within the glove industry due to its plentiful availability.

Types of Leather:

The **grain** leather is the external portion of the hide and provides a smooth, soft, and comfortable leather. Grain leather allows for more dexterity and sense of touch. It is priced higher than split leather due to its demand from the automobile, furniture, sporting industry, and apparel market.

The **split** leather is cut from the inner portion of the hide closest to the flesh. Leather's strength is due to the density of fibers and will vary depending on which portion of the hide is used. Split leather is more commonly used in the glove industry due to its abundance and diversity.

Cuts of Leather: The entire hide is used for various applications based the quality level of each section. The most durable leather which has the greatest density of fiber is located in the rear area (side) of the hide. The areas of the hide with the greatest fiber density also have a more consistent cosmetic texture and appearance. Likewise, the lower qualities of leather have a more nappy texture and appearance. Therefore, the most durable areas of the hide start with the "A" side area and continue to the "C" shoulder cut and the belly will represent the most economical cut.

- "A" Side – premium side used for our branded products such as Big Jake, Bronco, Bull's Eye, Road Hustler
- "B" Side – select side used for our SideKick series, 3211, 3204 series
- "C" Side – select side used for our 3213 series
- "A" Shoulder – select shoulder used for our 1400A series
- "B" Shoulder – select shoulder used for 1300 series
- "C" Shoulder – select shoulder used for 1350, 1200, 12010 series

Types of Linings

The most comfortable style is a full sock lining. Two-piece reversible linings as well as lined palm only are also available.

- Red Fleece (Jersey) - Cotton or cotton blended; Brushed for softness and thermal properties
- Pile (Boa Pile) - Cotton or blend; Soft; Used in a variety of clothing products
- Foam - Creates an air barrier protection; Lightweight; Provides a “cushioning” effect
- Thinsulate™ - Thinsulate™ is a trademark of the 3M Corporation, for a type of synthetic fiber thermal insulation used in clothing. The word derives from the words thin and insulate. The material was first sold in about 1980. Traps body heat
- Thermo-Sock™ - High loft matte fiber; Memphis’ Trademark
- Thermal - Commonly made with cotton; Specially sewn to create air pockets for natural insulation; Same material configuration as “Thermals”
- Wool - Nature’s best; Beware of imitations; Great for wet applications, dries quickly
- Kevlar - Mainly for cut protection; Used by NASA due to its heat and cold insulation factors*; Shows no degradation at temperatures as low as -370 F**
- Cotton/String Knit liners - Brushed acrylic micro-terry; Acrylic/ cotton/poly; 100% Acrylic
- 100% Thermastat—Hollow-core hydrophobic fiber; Greater thermal insulation; Fast evaporation rate; FDA Compliant

Thumb Patterns

- Straight - Runs parallel to fingers. This pattern is more common to canvas gloves and clute leather palms.
- Wing - Thumb crosses palm. This pattern provides the greatest extension and comfort.
- Keystone - Extra piece sewn-in for greater flexibility. This pattern contributes to a more snug fit and is also more common to dress gloves.

MCR Safety’s website features an image database for all of our products, on-line product training, our product reference library (PRL), and an expanded permeation guide to assist with making the most appropriate PPE selections. Visit www.mcrcsafety.com and click on “Distributor Resources”.

100 Gloves per Dispenser
10 Dispensers per Case

300D Acrylic Dispenser
Holds 3 Color Fusion boxes
to dispense 6 individual
items.

100 Gloves per Dispenser (50 each color)
10 Dispensers per Case

Note: Use CLRFUS @ \$10 as the service code for
combining 2 colors into one box with 2 openings.

GLOVES FOR FOOD PROCESSING APPLICATIONS

Our manufacturers confirm that our disposable styles are made of component materials that comply with all relevant federal regulations for food processing applications.

The FDA publishes a list of approved ingredients for the makeup of "articles (Gloves) intended for repeated use...in producing, manufacturing, packing, processing, preparing, treating, packaging, transporting, or holding food". This information is in the Code of Federal Regulations 21 CFR, Parts 170-199.

If a glove is manufactured with the FDA accepted ingredients listed in 21 CFR, Parts 170-199, you may advertise your product as "Component materials comply with all relevant federal regulations for food contact".

In the past, all products intended for direct food contact had to be manufactured with FDA accepted ingredients, and they had to be formally approved by the USDA. The procedure has now changed due to the liability involved. Self-certification of compliance with FDA materials is now acceptable.

USDA - United States Department of Agriculture

FDA - Food and Drug Administration

WHAT IS MEDICAL GRADE?

The FDA is responsible for determining whether or not a glove is suitable for medical applications. In our industry, we refer to certain gloves as being "Medical Grade". This means that a glove has met FDA guidelines for classification as a CLASS I medical device. These types of gloves have a variety of applications including physical examinations and handling pharmaceuticals. The gloves that we market as medical grade are non-sterile.

In order to market a glove as medical grade, you must submit a pre-market notification [510(K)] to the FDA. A [510(K)] application consists of several detailed questions, and it requires that two tests be performed and results listed. The first test is the FDA 1000 ml. water test that determines whether pinholes are present. The second test is A.S.T.M. D3578-77 that tests the physical properties of the glove. The physical properties that have to be recorded are Tensile Strength, Ultimate Elongation, and Modulus of Elasticity at 300% Elongation.

If the FDA accepts the performance of your glove, you are issued FDA registration numbers, and you may advertise your glove as medical grade, or FDA 510 (K) compliant. The FDA will not allow you to market your product as FDA "Approved" due the liability involved.

Memphis Survivor and Steelcore® component materials comply with all relevant federal regulations for food contact.

STYLE NO.	DESCRIPTION	QUANTITY PER CASE
-----------	-------------	-------------------

Variables Affecting Recommendation:

- 1) Temperature
- 2) Duration of time to hold object
- 3) Weight of object handled
- 4) How much dexterity is needed

Types of heat:

- Radiant – generated by a source of fire or by the sun.
- Ambient – the surrounding atmospheric temperature.
- Conductive – direct contact with hot surfaces.

NOTE: The weight and construction of the outer layer of material has a bearing on the amount of abrasion a glove can take.

As a general rule: Chores/Double Palms - recommended up to 200 degrees;
Hot Mills - recommended up to 400 degrees

RATING FOR DRY HEAT: E - Excellent G - Good F- Fair

NOTE: This is a GUIDE only. Due to the variables which affect glove performance, we recommend testing higher weights first to determine the most appropriate style.

Temp Range (Fahrenheit)	Holding Cycle	MGC Item #	Glove Recommendation	Rating

-----------	-------------	-------------------

ANSI / ISEA 105 ANSI CUT test Protocol

In effort for our hand protection industry to have a standard performance level analysis, the International Safety Equipment Association (ISEA) in conjunction with American National Standards Institute (ANSI) created test protocol known as ASTM F1790-97. Many of our cut resistant products reflect scores based on the portion of this standard for cut resistance which was developed in 1997. This cut protection performance test is often referred to as ANSI CUT.

This test method is significantly different than the CE cut resistant method. Cut resistance with a weighted gram load is measured in relation to distance to cut. A total of fifteen cuts (each with a new blade) are conducted. Five cuts each are made at three different gram loads. Test values are scaled based on the blade performance with a neoprene rubber material.

Recognize performance levels for CE and ANSI/ISEA 105 are different test methods and are calculated differently. Grams are used for the ANSI/ISEA 105 and the EN388 uses an "index" with a different scale for scoring. Test methods cannot be directly related. Different standards mean different performance at the same "level".

		Level 0	Level 1	Level 2	Level 3	Level 4	Level 5
Cut	Grams	< 200	≥ 200	≥ 500	≥ 1000	≥ 1500	≥ 3500

European Directives for Personal Protective Equipment

A European Directive establishing harmonized standards for all PPE items used in the European Union went into effect during 2004. Many of our hand protection offerings reflect the CE logo and a 4 digit performance rating that measure abrasion, cut, tear, and puncture resistance (ACTP). Listed below are the four physical tests that are required for protective gloves under European Standard EN388 and the results necessary to obtain each performance level rating.

Criteria		Performance Guide for EN388: Mechanical Hazards					
	Performance Level	0	1	2	3	4	5
A	Abrasion Resistance (Cycles)	<100	100+	500+	2000+	8000+	N/A
C	Blade Cut Resistance (Index)	<1.2	1.2+	2.5+	5.0+	10.0+	20.0+
T	Tear Resistance (Newtons)	<10	10+	25+	50+	75+	N/A
P	Puncture Resistance (Newtons)	<20	20+	60+	100+	150+	N/A

A glove's overall performance score is indicated by a series of four numbers (0-4). Note cut resistant scores can reflect 5 as their highest ranking. These four numbers represent (in order) the four test criteria listed above. The higher the numbers, the better the performance. Manufacturers may use an "X" to indicate not tested.

Know Your Cut Protection!

Cuts, lacerations, and punctures consistently rank in the top three categories for injury types based on the National Safety Council "Injury Facts" annual publication. In effort to guide you through our industry's test methods and arm you with information to make the most appropriate recommendations, we encourage you to rely on this catalog as your handbook.

Prior to making any product recommendations, to determine how much cut protection is needed consider these **qualifying questions**:

- ◇ Do you know the cut performance level needed?
- ◇ Is your cut performance level based on American National Standards Institute (ANSI/ISEA) ANSI CUT test or Certified European (CE) EN388 test?
- ◇ Do you have a specific gram performance level?
- ◇ Do you have a fiber or material (Alycore, Dyneema, HPPE, Kevlar, engineered yarn) preference?
- ◇ Do you have a polymer coating preference for grip requirements?
- ◇ Do you need liquid or chemical protection?
- ◇ Do you need thermal protection? If so, what is the temperature range and time of exposure?
- ◇ Will gloves be laundered?

Note: Cut resistant gloves and sleeves are not recommended to be used with serrated or moving blades. MCR Safety makes no guarantee or warranty (expressed or implied) of our products' performance or protection for particular applications. The end user is solely responsible for determining the suitability of any product selection for a particular application

MEMPHIS HERO™ - ANSI Cut 4 Cut Protection

MCR Safety takes pride in introducing our proprietary high performance cut resistant Memphis Hero™ series, providing higher levels of cut protection without sacrificing comfort. We spin Kevlar, stainless steel, and other fibers then knit both gloves and sleeves in 7 and 13 gauge offerings to achieve a **ANSI Cut 4**.

MCR Safety Manufacturing

MCR Safety's yarn manufacturing plant in Puebla, Mexico produces approx. 8,000,000 lbs. of yarn per year. We have a unique relationship with DuPont in that we are the only company that spins our own Kevlar yarn and knits our own Kevlar products. In addition to Kevlar, MCR Safety also manufactures cotton, polyester, and cotton/polyester blended yarns in an assortment of colors. About 75% of these yarns are spun from recycled materials. This plant employs 150 people operating 24 hours a day, 7 days a week.

MCR Safety began knitting string knit products in 1987. Original knitting was in Memphis, then Mississippi, and currently San Luis Potosí, Mexico which operates 24 hours/day, 6 ½ days per week producing 156,000 pairs of gloves per day. In addition to knitting gloves and sleeves, we also provide several coating configurations such as dot, block, palm coat, and criss-cross patterns. This plant produced 3,000,000 Kevlar sleeves in 2012. The rolls of tubing to produce these sleeves were 7,000,000 ft long or 1,325 miles, which would stretch from Memphis, TN to Phoenix, AZ. In addition to general purpose string knits, cut resistant gloves and sleeves are our fastest growing product group.

WWW.MCRSAFETY.COM

About Us - A brief recap of our company history, products, corporate brands, and vision statement.

Contact Us - Contact information for all departments at MCR Safety.

Sales & Service - Find a Distributor or the MCR Safety Team for your area.

Gloves: This page is organized by the type of material used to produce the glove such as Leather, Cotton, Strings, Cut Protection, Supported, Unsupported, and Accessories. Browse each catalog by industry application or further define your search by selecting key attributes such as cut level, size, or lining.

Glasses: This page is grouped by brand and organized by glasses, goggles, face shields, head gear, and other categories. Browse these catalogs by key features such as series name, lens color, frame material, or other attributes.

Garments: This page is organized by FR Gear, River City Garments, Memphis Welding, and features our Custom Garment Program. Further define your search by materials, series name, and additional components.

Resources - This section contains the resources we are most frequently asked for such as SafetyLine newsletter, Catalog, Featured Products, Document Library, Industry Links, Videos, Tools, and Image Library. Also Request a Login from this page. Exclusive Distributor Resources tab will only be available after logging in.

Product Document Library contains links to all of our catalogs and product listing, specification sheets, sales literature in PDF format for emailing, material safety data sheets (MSDS) on lens cleaning products, and guides to assist in the proper selection of gloves and rainwear. Some chemical permeation data is available for specific products.

Industry Links - links to industry product information and standards, safety councils, and publications such as OSHA, ISEA, etc.

Tools (Permeation Guide) is available for several of our supported and unsupported hand protection styles which have been tested for the break through times against a wide assortment of chemicals. Search for chemical Methyl Ethyl Ketone (MEK) and note the variety of hand protection styles that are listed with their breakthrough times for this chemical.

Distributor Resources: Log in for access to our Reference Library, Online Training, Cross Reference Guide, Video Library, Turn & Burn Special Offerings, close out lists and our Custom Garment tool. This program allows the customer to select the specific attributes to customize safety vests and shirts.

Reference Library Search by specific style number, by series name (eyewear), by type of material (gloves), by type of apparel (clothing), or more advanced search for specific product features. Specific product features are outlined, product image, sales tips, and a direct link to the spec sheet. Note several options are displayed.

On Line Product Training will provide in-depth knowledge about our products and is a valuable tool for new or seasoned sales personnel. When you have a few moments, review the demo provided, or just jump right in... each training module takes only about 20-30 minutes to complete.

Cross Reference Guide will help to identify the MCR Safety equivalent for style currently being used. For example, to search for Ansell 11-800 choose the product category, enter the manufacturer, and style number or use keyword search. Note the easy access back to PRL for more specific information about the glove being displayed.

Press Room: We have organized our media and events into three categories: "In The News", Marketing Schedule (printed advertising), and Trade shows/End User events.

Information Request: The information Request tab features "Ask an Expert", Download a catalog, or request additional information about national advertising.

Innovations - MCR Innovations is designed to identify, develop and distribute "next-generation" PPE, utilizing the latest technologies and product innovations. The product portfolio will be highly focused on technically unique offerings that provide safety solutions across the spectrum of hazards faced by workers today.

Buy & Try: In support of our distributor efforts to generate new business, certain products displayed at end user events will be available for purchase. This program is designed to accelerate product evaluations by getting our gloves, glasses, and garments to the consumer.

LENS TYPE AND APPLICATIONS

Glass VS. Polycarbonate lenses

- The use of polycarbonate made protective eyewear lighter, less expensive, and most importantly much safer.
- Prior to polycarbonate, glass was used. While glass is a much harder surface, reducing lens scratching, polycarbonate excels in most other safety categories.
- Polycarbonate is soft, making it receptive to scratches, but it can absorb a high impact without breaking.
- Manufacturers use coatings on the lens to increase the lens “hardness” to resist scratching.
- Virtually all safety spectacles use polycarbonate for their lenses.

Things to consider when choosing a lens

- Protective eyewear is available in a variety of tinted lenses as well as clear. These tints are not merely decorative, but are designed to enhance the workers vision under various lighting conditions.
- The amount of visible light that passes through each lens and how the lens tint affects vision are important factors in lens selection.
- Luminous (light) transmission, amount of visible light passing through a medium (a lens in this case) is important. The American National Standards Institute (ANSI) provides guidelines for clear and filter plano (non-prescription) lenses in its Z87.1-2003 edition.
- For instance, the luminous transmission of a clear lens must be between 85% and 100%.

Lens Coatings

- Duramass[®] Hard Coat—our standard scratch resistant coating
- Duramass[®] Anti-Fog Coat—our standard anti-fog coating
- Max 3[™] Hard Coat—three times the scratch resistance than traditional coatings for US Safety Glasses
- Max 6[™] Hard Coat—six times the anti-fog properties than traditional coatings for US Safety Glasses
- Bossman[™]—high quality mirror lens coating for US Safety Glasses (Includes Duramass[®] Hard Coat)

Clear

- 90% of light is transmitted – the remainder of light is blocked by the coating on the lens.
- Provide excellent optics for general applications.
- Most popular lens because it allows the majority of light to pass through the lens while not distorting the visible color spectrum.
- It also absorbs 99.9% of UV radiation.
- General purpose providing maximum impact protection and maximum visibility.

Gray

- 15% of light transmitted.
- Reduces the amount of light that passes through the lens.
- Commonly used in construction or outdoors where sunlight and glare cause eyestrain and fatigue.

Amber

- 80% of light transmitted.
- Excellent for maximum contrast enhancement, particularly in low light situations.
- The amber lens color blocks virtually all blue light to reduce haze and glare making all blue look black or gray.
- The disadvantage is that when you eliminate blue light, you distort color recognition.

Vermilion

- 55% of light transmitted.
- This lens reduces the light proportional to the way your eye sees it. It reduces all colors equally allowing for optimum color recognition.
- It works to reduce brightness while maintaining color.
- Great for electricians, computer applications as well as outdoors where all color must be observed and not distorted.

Indoor/Outdoor Clear Mirror

- 48% of light is transmitted.
- Clear lens with a mirrored coating on the outside.
- Allows more visible light through than other tinted lenses and may be used indoors.
- Best for workers going inside to outside, like forklift drivers, for reducing glare from artificial light such as halogen and florescent. Lens is not transitional.

Orange

- 57% of light is transmitted.
- Reduces eye fatigue by absorbing blue and green light.
- Excellent for indoor and low light applications; cloudy or hazy days.
- Enhances visual contrast to improve depth perception.

Brown

- Distinguishes color while reducing glare and brightness for outdoor applications. Meets the traffic signal recognition requirements of ANSI Z80.3.
- Commonly used in construction or outdoors where sunlight and glare cause eyestrain and fatigue.

Light Blue

- 70% of light transmitted.
- Option to Indoor/Outdoor lens.
- Reduces glare from artificial light such as halogen & fluorescent.

Blue Ice- Stylish alternative for outdoor use

- 33% of light transmitted.
- Reduces the amount of light that passes through the lens.
- Commonly used in construction or outdoors where sunlight and glare cause eyestrain and fatigue.
- Meets the traffic signal recognition requirements of ANSI Z80.3.

Mirror – Gold, Silver, Blue, Fire, Emerald, and Blue Diamond

- 9% of light is transmitted.
- Gray lens with mirrored coating on the outside.
- Commonly used in construction or outdoors where sunlight and glare cause eyestrain and fatigue.
- The “mirror” coating reflects light reducing the amount of light that passes through the lens.

Filter shade lens

- Filter shades lenses protect against ultraviolet and infrared radiation that is generated when working with molten metal and in welding, cutting, soldering, and brazing operations.
- Filter shades are marked with a number on the lens indicating the shade number.
- Filter 2.0 lens 29-43% of light is transmitted.
- Filter 3.0 lens 8.5-18% of light is transmitted.
- Filter 5.0 lens 1.18-3.16% of light is transmitted.

Anti-fog Coating

- Duramass[®] AF and Max 6[™] coatings provide anti-fog, anti-static, and 99.9% UV prevention.
- To be used in high humidity environments or where sudden shifts in temperature occur.
- Provides excellent fog preventing properties.

MCR Safety recognizes that these are general definitions and recommends you should always consult with your safety director at the facility where the products are to be used to insure the proper application.

US Safety glasses are designed to provide solution-based eyewear protection. This brand is distinguished with application based, stylish design elements and superior coatings for work and play.

We are MCR Safety... Just Try To Outwork Us!	+1.0

****Text size based on the Rosenbaum Optical Test Card viewed at 14 inches. The magnifying eyewear is designed to focus at a distance of 14 to 26 inches.**

COMMON APPLICATIONS FOR RIVER CITY GARMENTS

INNOVATIVE STYLES:

FRMCL2L—The Modacrylic blended background material is inherently FR and meets ASTM F1506 as well as NFPA 70E. The FRMCL2L Modacrylic Blend Vest is ANSI/ISEA 107-2010 Class 2 compliant. Some additional features are the 2" FR 3M retro-reflective material and D-ring access for use with fall protection. This material is soft, strong, and resilient and has look and feel of cotton. Applications include utility crews, electrical workers, petrochemical, transportation, ports, road construction, and survey crews.

PGCL3L—The jacket features a soft shell polyester/spandex material bonded with a micro-fiber fleece liner and 2" 3M reflective material. The polyester outer shell material meets ANSI standard AATCC 22-2002 for water repellency and ASTM E96:2005 for breathability. Two outer pockets and one chest pocket feature waterproof zippers. The jacket also includes a fleece neck storm flap for added comfort and sleeves with adjustable/elastic take-up wrist closures.

PREMIUM STYLES:

Luminator - Our hi-vis Luminator offerings are available in different materials and these styles: Classic, Challenger, Wizard, and Navigator. Excellent for any application where visibility is top priority, Sanitation Workers, Police, Road Crews, and Airlines.

Challenger (7368) - .54mm, Nylon/PVC over PVC/Nylon. Multiple layer construction with over twice the thickness of our original challenger in a reversible raincoat. Great for Security and Law Enforcement applications.

Concord (800) - .35 mm, Neoprene/Nylon. Mining industry, petroleum related industries, logging and ship building organizations.

Hydroblast (840) - .35 mm, Neoprene/Nylon. Suits specially designed for hydroblasting. Excellent for any clean-up operation. Adjustable closures ensure water tight seals at all openings.

Dominator (388) - .42mm PVC/High Tensile Poly/PVC. Limited Flammability, green fabric is quickly identified for chemical applications including chemical plants, refineries, and environmental clean-up.

Navigator (550) - .22mm Polyurethane/Nylon. Limited Flammability, lightweight taffeta fabric.

Navigator (597) - .35mm Polyester/Polyurethane shell with a soft polyester liner. Great for tough, dirty jobs where durability is an issue. Breathable material adds comfort.

PLUS STYLES:

Cyclone (400) - .35mm PVC/Nylon/PVC. Limited Flammability, poultry and meat packing plants, concrete plants, any abrasive situation.

Wizard (300) - .28mm PVC/Nylon/PVC. Limited Flammability, chemical protection, fertilizer plants, trucking industry, D.O.T.'s, sanitation workers, and paper mills.

Hydroblast (390) - .28mm, PVC/Nylon/PVC. Suits specially designed for hydroblasting. Excellent for any clean-up operation. Adjustable closures ensure water tight seals at all openings.

Challenger (700) - .16mm PVC/Nylon. Used in amusement parks, golf courses, company recognition, and safety awards.

Classic (200) & Classic Plus (240) - .35mm PVC/Polyester. All around "Classic" foul weather gear, construction industry, utilities, municipalities, airlines, environmental clean-up. Resists most oils, acids, and solvents.

Commodore (600) - .40mm PVC/Non-Woven Polyester/Nylon. All weather suit, provides warmth in winter, absorbs perspiration in summer, protects against industrial oils and solvents.

Schooner II Poncho (2000) - .35mm PVC/Poly. Designed for recreational purposes including sporting events, concerts, hunting, and fishing.

VALUE STYLES:

Squall (070) - .20mm Single Layer PVC. Refinery clean-ups, day labor situations, general maintenance, theme parks, & prisons.

Zodiac (050) - .10mm Single Layer PVC. For light splash protection, day labor situations, and any disposable need.

Schooner (040) & Schooner Jr. (020) - Schooner O40 is .10 mm PVC and Schooner Jr. is .02 mm Polyethylene. For recreational purposes including sporting events, concerts, hunting and fishing.

Aprons and Sleeves (063,073) - 6 & 8 mil Vinyl. Used in meat, poultry, and vegetable processing plants.

*One time setup fee of \$200.00 for glove imprinting program.

*Imprinting available on most leather, cotton, and string styles.

*Imprint and tagged orders must meet the minimum quantities or there will be a \$25.00 charge.

*Additional costs and approvals are necessary on complicated logos or designs. Allow additional time to process.

*The following are average business days to process new orders:

- 5 days for artwork approval,
- 12 days to receive imprints in house, and
- 10 additional days for imprinting on all new imprints

Disclaimer: All private label orders are scheduled to be exact quantity of order. However, we reserve the right to ship and bill overruns of no more than 10% of the order. Prices are subject to change without notice.

SILKSCREEN—We can silkscreen block letters or company logos (with camera ready artwork or print ready file), either of which can be applied to the back, or left or right chest of jackets, and/or left or right leg of pants.

Type	Description	1-19 Qty	20-47 Qty	48-503 Qty	504+ Qty
SSPU	Per impression charge (garments)	\$2.50 each	\$2.00 each	\$1.00 each	\$.75 each
SSPUV	Per impression charge (vests)	\$2.50 each	\$2.00 each	\$1.00 each	\$.75 each
SSSU	Silkscreen set up charge (one time per color)	50.00/screen	50.00/screen	50.00/screen	50.00/screen
SSMC	Less than minimum charge	50.00	50.00	50.00	50.00

Notes: Minimum quantity of 20 pieces, less than 20 pieces for \$50.00. Charges are based on a one-color, one-position logo. VA220R, VA221R, and all CHEV style vests cannot be imprinted. Rainwear less than .20mm cannot be imprinted.

Standard ink colors for silkscreening are: Orange, Red, Yellow, Black, White, Royal Blue, Dark Blue, Emerald Green, Dark and Green. Colors outside these listed are considered custom and there will be a \$200 ink charge. Maximum number of colors is two.

REPACKAGING—We also offer the convenience of repacking our product to the distributor’s special packaging.

GLASSES IMPRINT PROGRAM

Pad Printing on Frames & Lenses

- To insure better quality imprinting, camera-ready artwork or a print ready file is needed with PMS colors.
- All charges are in addition to the cost of product.
- Standard, in-stock ink colors only. Special ink colors by quote only.
- Multi-Color imprinting maximum of four colors.
- If the same imprint will be on both temples, please double the number of imprints and price accordingly.
- If a different imprint is on each temple, the pricing will be calculated per imprint.
- We can imprint on the lens or frame. Specify left or right and upper or lower lens position for logo.
- Lead Time: 2-3 weeks from the date the artwork is approved. Allow an additional 5 days for artwork creation.
- No other set up or plate charges.
- Samples of an imprint: \$100 for 12 pr of imprinted glasses in one color logo.
- Additional samples are \$25.00 per piece and additional colors will be \$25.00 for each color.

Imprinting fees based on **same eyewear style** and **same imprint color**, minimum of 72 pair.

Quantity	Single Color	Multi Color

1020 and Up PR	QIMPS3 \$0.40/pr	QIMPM3 \$0.75/pr

BCPBAG	Attach UPC bar code to outside of poly bag of each glass	.05 pr
BCTEMP	Attach UPC bar code to temple of each glass	.40 pr
FSRLABEA	Labeling Faceshield	.07 ea

GENERAL INFORMATION

- MCR Safety sells to distributors only.
- MCR Safety provides same day shipments.
- MCR Safety provides drop shipments at no additional cost, subject to meeting \$500.00 minimum order.
- MCR Safety has special imprinting and boxing available on specified quantities and styles for hand protection, protective eyewear, and protective clothing. (Minimum quantities necessary)
- Satisfaction is guaranteed on all merchandise or it can be returned within 30 days for full credit. (Return authorization required—see below)
- MCR Safety makes no guarantee or warranty (expressed or implied) of our products' performance or protection for particular applications. The end user is solely responsible for determining the suitability of any product selection for a particular application.

TERMS AND CONDITIONS

- Terms are Net 30 days from invoice date, unless otherwise specified by us.
- Prices F.O.B. our warehouse with handling fee \$.50/ctn on UPS/PS shipments.
- Freight claims and shortages must be recorded on delivery receipt at time of delivery.
- Prices and terms are subject to change without notice.
- Minimum order \$500.00. \$25.00 surcharge on any order less than \$500.00.
- \$75,000.00/year (\$6,250.00/month) purchases required to maintain distributorship.
- 15% restocking fee on returns. Imprinted product is non-returnable.
- When stored correctly, MCR recommends a shelf life of 2 years from the original manufacturer date for Nitrile and Vinyl gloves. Latex gloves have a shelf life of 1 year and of 6 months for the chlorinated gloves. It is recommended storing disposable gloves in dry conditions and in the original package. MCR Safety will not accept returns of disposable glove orders older than four months.
- For a return, please call 800-955-6887 to request a return authorization number and document this number on your return. Please note that a return is not valid until shipment is received and all items are inspected for proper quantities, packaging, and overall resalable condition. No credit will be issued on any items found non resalable. Arrangements to claim items non returnable must be made within 15 days of notice or items will be discarded. Do not deduct the return dollar amount until a credit invoice has been issued. This RGA is invalid after 30 days of issue.
- We warrant and represent that the goods will conform to their written description and specifications and be free from defects in material and workmanship. No express or implied warranties whether of merchantability or fitness for a particular use shall apply to products sold by us and such warranties are disclaimed. We are not liable for delays in performance of orders or in the delivery of shipments. Customer shall hold MCR Safety harmless from any suits, claims, losses or liabilities made against us arising from any claim of, or infringement of, patent, copyright, trademark or other propriety right resulting from our use, possession, sale or delivery of any goods to the customer in conjunction with their requirements. All transactions shall be governed by the laws of the State of Tennessee and actions or proceedings shall be litigated in the courts of Shelby County, State of Tennessee.
