Kevlar®-Lined Waterstop™/Oilbloc™
Goat-Grain Arc-Flash Drivers Glove

Oilbloc™ treatment

#378GOBKL

Kevlar® lining

Supple goat-grain drivers gloves are processed with Superior's own Oilbloc™ treatment for exceptional water and oil repellency. Oil simply won't soak through, not hours—or even days—after being dropped onto leather. (Untreated leather absorbs oils and liquids within seconds of contact.) Gloves are highly stain resistant, without picking up contamination, provide greater safety. These gloves are also treated with Waterstop™, a fluoro-chemical water-repellent emulsion for excellent water, oil, and stain-repellent properties.

Great care has been put into these gloves to minimize oil buildup, which can provide an additional source of flaming. Arc-flash testing placed these gloves at level 2, with a rating of ATPV = 21 cal/cm². Note: these gloves are designed for spark and flame resistance, not thermal contact.

The seamless-knit, cut-resistant Kevlar® liner offers ASTM level-2 cut protection. Elasticized backs provide a snug fit, allowing gloves to slip on and off easily. Stock may vary in color - brown or grey.

TESTIMONIAL

EOR Technician, Oil Industry

"I have received the product and have run them through a series of tests. I am very happy with every aspect of this product; comfort, fit, cut protection, fluid exposure, as well as other things that this item is not "rated" for such as moderate heat exposure. I was so pleased, I requested over a dozen other gloves for others in the department. I intend to promote your product throughout our research lab."
