Marine Absorbents

High absorbency on the water

Brady SPC marine absorbents are specially designed to float on water and contain or absorb a wide variety of marine fuels and oils. From containment to booming and skimming operations, these absorbents will soak up unwanted fluids on lakes, rivers, streams and coastal shorelines. Marine absorbent products are made for high absorbency and rapid deployment in demanding emergency situations.

Absorbent Booms

Brady SPC absorbent booms are designed to help you clean up oil spills on water by absorbing surface liquids.

Booms are constructed of highly absorbent polypropylene fibers encased in a durable skin that is lined with a heavy duty tow rope. The booms are fastened with three stainless steel connectors to allow for linkage and fast deployment in emergency situations as well as for strength during retrieval or when towing heavy booms saturated with oil.
