# SIMpull™ FLEXIBLE METAL LEADER FISH TAPE

- Spiral extruded polymer design reduces the amount of effort required to push or pull the fish tape through EMT or PVC conduit\*
- Swiveling flexible metal leader easily glides through bends
- Allows the fish tape to glide through conduit without binding at joints, couplings or 90 degree bends
- Combines the strength of a steel fish tape with greater flexibility than fiberglass fish tapes\*

# SIMpull™ FISH TAPE

Southwire's versatile fish tape works great for filled or empty conduit: 4.5mm models up to 2-inch conduit and 3mm models up to 1-inch conduit. Faster, easier pulls: their low friction design allows the tape to easily glide through the conduit without binding at turns, joints or couplings. Spiral extruded polymer reduces the amount of effort required to push or pull the fish tape through EMT, IMC, Rigid, and PVC conduit.

## TWO LEADER TYPES:

- Swiveling flexible metal leader easily glides through bends
- Non-conductive, glow-in-the-dark tip easily and safely pushes through already installed wires.

**POLYMER FISH TAPE  
WILL NOT RUST**

**GREATER FLEXIBILITY THAN  
FIBERGLASS FISH TAPES**

**WILL NOT BREAK WHEN  
FOLDED OR LEAVE SPLINTERS**
