

PRODUCT SPECIFICATION REPORT

ZEP LUBEZE TAPS-IT™ Liquid Tapping Fluid

DESCRIPTION

A water soluble, liquid, tapping compound. Designed to be used for blind holes and for deep vertical hole tapping during high production operations.

FEATURES

- Good Lubricity
- Versatile Usage
- Easy Application
- Easy Cleaning
- Pleasant to use

BENEFITS

- Formulated with high pressure additives which form a solid lubricant layer between the chip and tool. Eliminates chip welding, tap burning and reduces tap breakage.
- Can used with a wide range of metals such as steels, cast irons, stainless and nickel alloy, copper and die casting. Compatible with water-based metalworking fluids.
- Zep Lubeze Taps-It liquid can be applied directly from squirt bottle.
- Water soluble – will not leave deposits on the machine and/or thread holes. Can be cleaned using water or an air hose.
- Will not smoke or smell like many solvent-tapping compounds.

APPLICATIONS

A water soluble liquid tapping compound designed to be applied directly from the squirt bottle directly to the tap during production or to a stationary tap.
